It's 2.8 reading of phosphate in the distribution system. I wanted to know the effects of is there a danger with it being so high for people at the beginning of the system

Dear Mr. Woodson:

Attached is the phosphate factsheet referenced in the email below.

Thank you for your patience. Please feel free to contact me if you have any questions.

Best wishes,

Heather

Subject: U.S. EPA-Region 5 response regarding phosphate question

Dear Mr. Woodson:

Thank you for your December 11, 2015 inquiry to our office, the U.S. EPA-Region 5. My colleague, Heather Shoven, forwarded me your question regarding the potential health effects of phosphates. The Michigan Department of Health and Human Services, in collaboration with our EPA-Cincinnati office, is in the process of developing a phosphate factsheet. Until the factsheet is available, below is a link to NSF International, which has detailed information regarding the additive.

[http://www.phosphatesfacts.org/pdfs/NSF International Statement - Phosphate Treatment Chemicals.pdf](http://www.phosphatesfacts.org/pdfs/NSF%20International%20Statement%20-%20Phosphate%20Treatment%20Chemicals.pdf)

Thank you for your interest in this matter.

Sincerely,

Kim Harris
